Margaret Noble, University of Tasmania

Appendix A: Top 50 Tables and Indicator Correlation Analysis

Table A1. All regional and remote average attainment (completion)

The top 50 regional and remote postcodes ranked for all regional and remote students for average attainment from 2011–2016 (%) in higher education. The average standard deviation, % of attainment change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on attainment were obtained from the Department of Education and Training Higher Education student data collection.

ALL REGIONAL AND REMOTE								
Rank	Postcode	Suburb	Average attainment 2011–16 %	Average standard deviation	Attainment change 2011–16 %	Population 2011	Population 2016	SEIFA IEO 2016

Table A4. Non-English speaking background (NESB) average attainment (completion)

The top 50 regional and remote postcodes ranked for all regional and remote students with non-English speaking background (NESB) for average attainment from 2011–2016 (%) in higher education. The average standard deviation, % of attainment change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on attainment were obtained from the Department of Education and Training Higher Education student data collection.

Table A8. Disability average access

The top 50 regional and remote postcodes ranked for all regional and remote students who identified as having a disability for average access from 2011–2016 (%) in higher education. The average standard deviation, % of access change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on access were obtained from the Department of Education and Training Higher Education student data collection.

Table A11. Low SES areas average access

The top 50 regional and remote postcodes ranked for all regional and remote students from low SES areas for average access from 2011–2016 (%) in higher education. The average standard deviation, % of access change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on access were obtained from the Department of Education and Training Higher Education student data collection.

Table A14. Disability average participation

The top 50 regional and remote postcodes ranked for all regional and remote students who identified as having a disability for average participation from 2011–2016 (%) in higher education. The average standard deviation, % of participation change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on participation were obtained from the Department of Education and Training Higher Education student data collection.

Table A17. Low SES areas average participation

The top 50 regional and remote postcodes ranked for all regional and remote students from low SES areas for average participation from 2011–2016 (%) in higher education. The average standard deviation, % of participation change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on participation were obtained from the Department of Education and Training Higher Education student data collection.

Table A**20**. Disability average retention rate

The top 50 regional and remote postcodes ranked for all regional and remote students who identified as having a disability for average retention rate from 2011–2016 (%) in higher education. The average standard deviation, % of retention rate change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on retention rates were obtained from the Department of Education and Training Higher Education student data collection.

Table A23. Low SES areas average retention rate

The top 50 regional and remote postcodes ranked for all regional and remote students from low SES areas for average retention rate from 2011–2016 (%) in higher education. The average standard deviation, % of retention rate change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on retention rates were obtained from the Department of Education and Training Higher Education student data collection.

Table A26. Disability average success rate

The top 50 regional and remote postcodes ranked for all regional and remote students who identified as having a disability for average success rate from 2011–2016 (%) in higher education. The average standard deviation, % of success rate change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on success were obtained from the Department of Education and Training Higher Education student data collection.

Table A29. Low SES areas average success rate

The top 50 regional and remote postcodes ranked for all regional and remote students from low SES areas for average success rate from 2011–2016 (%) in higher education. The average standard deviation, % of success change, population 2011, population 2016 and the SEIFA index for 2016 for each of the ranked postcodes are included. Data on success were obtained from the Department of Education and Training Higher Education student data collection.

* Correlation coefficient is a value between -1 and +1 showing the strength of association between two variables. A coefficient of +1 indicates a perfect linear relationship, 0 indicates no relationship and -1 indicates a perfect inverse relationship. Note as these are whole population data sets the concept of significance is not applicable.
